

I am concerned about the proposal for the broadcast system LPFM having priority over FM translator services. My family are avid K-Love listeners. This change could affect our listening. We choose K-Love because we can trust the content. I do not have to censor my children's listening when K-Love is playing. This is the only station in the area that this is true. We are able to hear local updates of events that we choose to be involved in. In a world where kids are exposed to so much negative K-Love offers a place of hope and encouragement. I cannot imagine listening to another station. We are also grateful that we can hear K-Love throughout the country as we travel and know that we will have the same consistency that we have at home. I urge you not to allow LPFM stations to have priority over FM translator service.
